Sea lions - take care

Australian sea lions are rare and protected. They can be found on and around Little Island and Burns Rocks for most of the year and they fish and swim in nearby waters. Sea lions are attractive and interesting creatures but can deliver a nasty bite if aggravated. For your safety and the protection of this species, you are required to keep at least 10m from sea lions at all times. If a sea lion approaches you in the water, move away or remove yourself from the water until the sea lion has swum away.

Whales - keep your distance

During various times of the year, the waters of Marmion Marine Park host a variety of marine mammal species. Humpback whales can be seen during the winter months as they migrate to and from their summer feeding grounds in Antarctica and breeding areas in the north of Western Australia. Please stay at least 100m away from whales and do not approach within an arc of 60 degrees of the whales direction of travel or direction it has just travelled. See diagram overleaf.

Help protect our wildlife - no feeding

Do not feed dolphins, sea lions, sea birds or any other wildlife - this helps protect their health and wellbeing. Although you may feel you are doing them no harm, feeding changes their behaviour from hunters to beggars and increases their vulnerability to disease, boat strikes and entanglement in fishing line. Please report sick or injured wildlife by phoning the Wildcare helpline on (08) 9474 9055.

Legend

- Boat ramp
- Diving
- Fishing
- GPS validation
- Lookout
- Picnic area
- Snorkelling
- Spearfishing prohibited
- Swimming
- Surfing
- Wreck
